ABOUT ME

I'm Alina, a UX/UI Designer and I'm here to be a part of your team. Together we can come up with creative solutions for user-centric digital products and services.

I born in Ukraine, but now I live in Israel. I was drafted into the fighting forces of the Israeli Army. In the army I was a lone soldier (since my parents continued to live in Ukraine), I lived in Israel myself not knowing the language and not having friends and acquaintances here. I learn quickly and am able to see the positive in places where it is difficult to find.

I'm a creative, analytical, and inquisitive person, who easily adapts, has a collaborative attitude and cares about productive teamwork.
